

PIXEL FLOOR PAINT

PRODUCT DESCRIPTION AND USES

Pixel Floor Paint is an alkyd base paint with a special, tough and flexible resin and pigmented with oxide pigments. It is ideal for the decoration and protection of interior concrete floors. It offers excellent adhesion to concrete floors, high opacity and good abrasion and scrub resistance.

SURFACE PREPARATION

New or old concrete floors must be clean from all contaminants. Smooth surfaces should be etched with 10% etching solution to form a key. Washed off with water to remove all traces of acid and allowed to dry thoroughly. Two coats of pixel Floor Paint is recommended for new surfaces.
