

PIXEL METAL GREY OXIDE PRIMER

PRODUCT DESCRIPTION AND USES

Pixel metal Grey Oxide Primer is an alkyd resin based general purpose metal Primer. It can be applied on steelwork, commercial vehicle bodies, machinery, metal casement, windows etc. Pixel metal Grey Oxide Primer is tough and durable.

SURFACE PREPARATION

Surfaces to be painted must be completely dry and clean. Rust, grease and loose paint must be removed by wire brushing, scraping or sandblasting.

Old paint can be removed using Paint Remover, while grease and oil can be removed using Thinner.

FINISH

Matt

APPLICATION

By brush or spray gun.

Apply two coats of pixel metal Grey Primer giving an interval of 12-14 hours between coats. Slight sanding of the first coat is advisable before applying the second coat.
